

Dear LaRue County School Families,

There has been a recent change in requirements for immunizations in order to attend school. Effective July 1, 2018, ALL students in kindergarten through twelfth grade must show proof of having received two doses of Hepatitis A vaccine to attend school.

If your child has already received two doses of Hepatitis A vaccine, he or she will not be required to receive it again, however a new updated Immunization Certificate will need to be turned in to your child's school as proof. Many students already have this vaccination, but at the time it was not required to be listed on immunization certificates. The new certificates now have a place for this information. It is your responsibility to contact your child's physician to make sure he or she have received this vaccination and obtain an updated immunization certificate that verifies this. Our school will require this of all students prior to attending the first day of school for the year 2018-19.

Feel free to send copies of current valid immunization certificates in at any time.

If you are interested in having the Nurse Practitioner administer these shots please call her office to set up an appointment. Katie Cruse 1-844-435-0900.
